

## **USB Port Update:**

**This is an update to advise our clients about the USB issues with some computers. The USB ports in the front of the computer are sometimes shared with the USB ports in the back. So if you using all the back USB ports and you need to add another USB device please buy a “Powered USB Hub” and unplug all the USB Devices in the back of the computer and plug all of them into one USB Hub. Do not plug the scanner into the USB Hub that has to be plugged directly into the USB port on the back of the computer.**

**Also when it comes to what devices you can plug into the HUB they are:**

- 1. Any and all types of printers**
- 2. Any mouse**
- 3. The Dymo LabelWriter**
- 4. Keyboards**

**The Fujitsu Scanner has to be plugged directly into the back of the computer, and not in the hub.**
